

City Systems-of-Systems Intelligence

17 Dec. - 15 Feb.

The goal of this challenge was to create a new analytical method, unbound from state sovereignty presumptions, in order to understand and identify vulnerabilities that exist within the structure of cities so as to preempt innovative opportunists from disrupting social order.

Judging Criteria

- Use of open source technology
- Number of cities evaluated
- Physiology
- Anatomy
- Psyche
- Relational

Challenge Winners

- 1st and 2nd Place Tie – Seth Sites and Kimberly Hale - \$8,750 each
